Lab 2: Agile Backlog Creation & Sprint Simulation in Jira — VaxSchedule Project

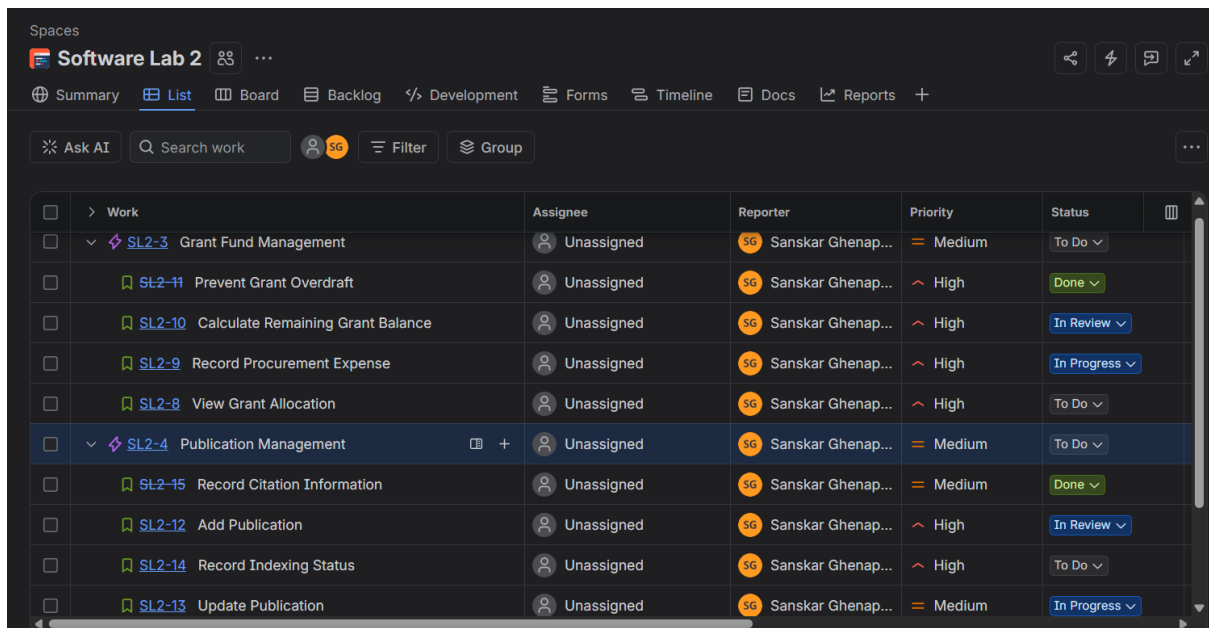

Problem statement: Faculty Research Grant & Publication Tracker

Name : Sanskar Bahubali Ghenappagol

SRN : PES1UG24CS614

Sec : K

1) EPICs and Stories :

The screenshot displays the Jira Software Lab 2 interface. The top navigation bar includes tabs for Summary, List, Board, Backlog, Development, Forms, Timeline, Docs, Reports, and a plus icon. Below the navigation bar, there is a search bar labeled 'Ask AI' and 'Search work', followed by filters for 'Filter' and 'Group'. The main content area shows a list of work items under the 'Work' section. Each item is a story or task with a checkbox, a link to the item, a title, an assignee, a reporter, a priority, and a status. The items are as follows:

	Work	Assignee	Reporter	Priority	Status
☐	SL2-3 Grant Fund Management	Unassigned	SG Sanskar Ghenap...	Medium	To Do
☐	SL2-11 Prevent Grant Overdraft	Unassigned	SG Sanskar Ghenap...	High	Done
☐	SL2-10 Calculate Remaining Grant Balance	Unassigned	SG Sanskar Ghenap...	High	In Review
☐	SL2-9 Record Procurement Expense	Unassigned	SG Sanskar Ghenap...	High	In Progress
☐	SL2-8 View Grant Allocation	Unassigned	SG Sanskar Ghenap...	High	To Do
☐	SL2-4 Publication Management	Unassigned	SG Sanskar Ghenap...	Medium	To Do
☐	SL2-15 Record Citation Information	Unassigned	SG Sanskar Ghenap...	Medium	Done
☐	SL2-12 Add Publication	Unassigned	SG Sanskar Ghenap...	High	In Review
☐	SL2-14 Record Indexing Status	Unassigned	SG Sanskar Ghenap...	High	To Do
☐	SL2-13 Update Publication	Unassigned	SG Sanskar Ghenap...	Medium	In Progress

3) Sprint Board and Burndown Chart:

Sprint 1:

Sprint 2:

4) Reflection Questions :

1. Did your estimations reflect the actual effort?

Answer:

Yes. The story point estimates reasonably reflected the expected effort, complexity, and uncertainty of the user stories. Simpler features, such as View Allocated Funds and Record Citation Information, were assigned fewer story points, while more complex features, such as Prevent Grant Overdraft and Submit Approval Request, were assigned higher story points. Overall, the estimates provided a reasonable representation of the effort required for the planned work.

2. Was your backlog well-prioritized?

Answer:

Yes. The backlog was prioritized based on the importance and user impact of each feature. Core functionalities such as grant allocation, procurement expense recording, remaining grant balance calculation, and publication management were given higher priority. Approval management and grant analytics features were then organized according to their importance to the overall research management workflow. This helped structure the backlog in a logical order.

3. How did your simulated sprint align with your plan?

Answer:

The simulated sprints were organized according to the planned backlog. Sprint 1 focused on Grant Fund Management and Publication Management, while Sprint 2 focused on Co-Author Approval Requests, Dean Approval Management, and Grant Fund Analytics. The user stories were progressed through To Do, In Progress, and Done to simulate the Agile development workflow. Overall, the sprint structure followed the planned allocation of work.

4. What insights did the burndown chart give about your team's capacity?

Answer:

The burndown chart provided an overview of the remaining work and the progress made during the sprint. It helped in understanding how the planned story points were being handled over the sprint period and provided an indication of the team's capacity. It also demonstrated the importance of monitoring sprint progress so that workload, completion rate, and any differences from the planned progress can be identified.
